

VMware - SRM Site Recovery Manager

2 Day Outline

INTRODUCTION

V4.4

The vSphere suite of products consisting of: ESX Server 4.0, vCenter 4.0 and VMware Consolidated Backup, is both exceptionally powerful and comprehensive. Our SRM course is intended for students with strong experience working with ESX and vCenter. It is our intention to take your existing knowledge base and expand upon that. At course completion the student will be able to configure, support, and effectively test Site Recovery Manager.
